**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**International application No. PCT/EP03/04297

I. Basis of the report

This report has been drawn up on the basis of the application documents as filed.

III. Non-establishment of opinion with regard to novelty, Inventive step and Industrial applicability

The question whether the claimed invention appears to be novel, to involve an inventive step and to be industrially applicable was not subject matter of an international preliminary examination for the non-searched claims (Article 17(2)(a) or (3) and Rule 66.1(e) PCT; see also International Search Report).

V. Reasoned statement under Rule 66.2(a)(II) with regard to novelty, Inventive step and industrial applicability

To the extent that the international preliminary examination has been carried out (see paragraph III), the following should be noted:

With regard to the documents cited in the International Search Report, it can be stated that the invention as it is characterized in at least some of the claims has every appearance of not satisfying the criteria stated in Article 33(1) PCT, that is to say that it may not be regarded as being novel and/or involving an inventive step (see International Search Report, in particular the documents marked X and/or Y and the corresponding claim numbers).
